

# Basin Plan Reporting

Matter 8: The achievement of environmental outcomes at an asset scale

Principles for monitoring, evaluation and reporting:

- Fit for purpose
- Collect once use many
- Seek reporting alignment
- Maximise benefit of reporting

**Government of South Australia**

Department of Environment,  
Water and Natural Resources

## Matter 8

### Three Water Resource Plan Areas

Each with a **Long-term watering plan** that sets:

- Priority environmental **ASSETS**
- Environmental objectives and **TARGETS**
- Environmental water requirements

NRM report cards Trend and Condition Report Cards (annual)

Ramsar reporting

Numerous **supporting programs** including:  
The Living Murray  
Riverine Recovery Program  
SARFIIP  
Murray Futures  
Long-term intervention monitoring

### Data and knowledge

- BDBSA Other databases
- Project databases
- Reports
- Freely available data

Water and Natural Resources

# Focusing on the River Murray WSPA

## One Asset scale report card

This will integrate information across targets being assessed to provide an asset scale conclusion on environmental outcomes

## Multiple target report cards

Each target assessed will have it's own report card;  
Environmental Water requirements will also have a report card  
These will provide more detailed analysis and important contextual information.
