

Practitioner Workshop

20 – 22 March 2017
Brisbane, Queensland

The collage features several key elements:

- Map of Australia:** A central map of Australia with red location pins for Perth, Adelaide, Melbourne, Sydney, Brisbane, and other coastal cities. Labels include 'Western Australia', 'South Australia', 'New South Wales', 'Victoria', 'Tasmania', 'Northern Territory', 'Queensland', and 'Great Australian Bight'.
- Water Quality Report (Top Left):** A report titled 'NEW STEPHEN MOUNT FOR THE DEWENTON' with a 'Scorecard' showing a 'D' grade. The scorecard legend includes: A Very good, B Good, C Moderate, D Poor, E Very poor, ND No data available.
- Water Quality Report (Middle Left):** A report titled 'HEALTHY RIVER REEF PART' with a 'Scorecard' showing a 'C' grade.
- Water Quality Report (Bottom Left):** A report titled 'Tropics Report Card 2015' with a 'Scorecard' showing a 'B' grade.
- Map of Queensland (Bottom Right):** A detailed map of Queensland with various water bodies and catchment areas labeled, such as 'Sunbury', 'Georges River', 'Wollongong', and 'Chambers'.
- Water Quality Report (Bottom Right):** A report titled 'Quality card' with a 'Scorecard' showing a 'B' grade.
- Illustration (Bottom Right):** A colorful illustration of a yellow buoy with 'RESEAL KEEP CLEAN' written on it, surrounded by a fish, a turtle, and a bird in the water.

G'day

By the way, where are the loos?

Understanding The Technology

Who are we?

*The **National Report Card Network** is an informal forum where representatives from waterway report card initiatives meet to:*

- *Raise awareness of the various initiatives*
- *Exchange knowledge and ideas*
- *Learn from each other*
- *Explore opportunities for collaboration to deliver organisational goals and operational efficiencies*

National Report Card Network

Welcome

Welcome to the home page of the National Waterway Report Card Network (referred to as the 'Network'). The Network is an informal group of waterway health practitioners and specialists involved in producing report cards on waterway, estuary, harbour, reef and marine health across Australia.

The interactive map below displays the numerous organisations around Australia who develop and produce report cards on the health of waterways in their region. Explore the map by zooming in and clicking on the red pins to display details of each organisation, their report card and website link.

About the network

Currently the Fitzroy Partnership for River Health (FPRH) in Central Queensland is hosting the Network website. If you would like to add your organisation to this map, and/or would like to join the Network, please [click here to contact us](#).

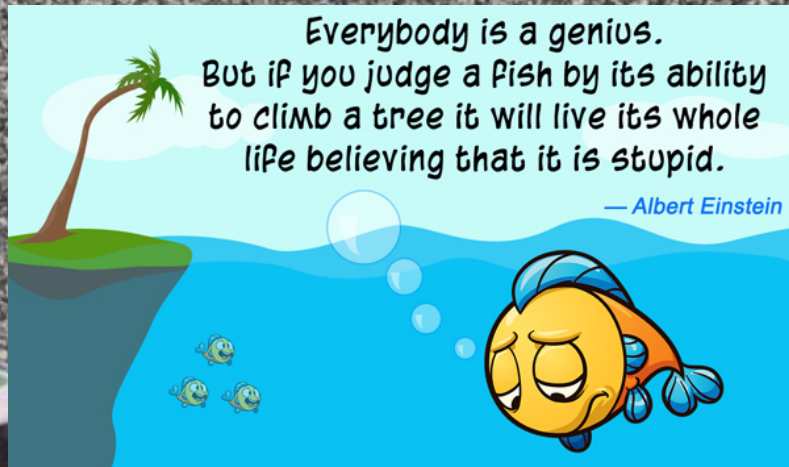

For more information about the Network, please [visit the About page](#).

Workshop Principals

Tuesday 21st March 2017

| Time | Item | How it will work | Facilitator |
|-------|---|---|--|
| 08:00 | Welcome | We say G'day and let you know where the loo's can be found | Nathan Johnston |
| 08:30 | Report Cards - what are they good for? | <p>Before we delve into the bowels of report card minutia, let's spend some time exploring why we do what we do.</p> <p>This session will reflect on the potential value and influence of environmental report cards. The presenter will draw upon success and learnings of established report cards as well other materials such as the recent Wentworth group report on water accounts.</p> | Di Tarte & Charlie Morgan |
| 09:00 | It's the principal of the matter | <p>This session is devoted to brushing up on the principals to consider and apply when initiating reporting programs and designing waterway report cards</p> <p>The presenter will reflect upon their knowledge and experience as well as resources like Integrating and Applying Science: A handbook for effective coastal ecosystem assessment and the Aquatic Ecosystems Toolkit</p> | Heath Kelsey & Bill Dennison (Video) Mike Ronan, and Glen Scholz |
| 09:30 | Speed reporting | <p>Every report card initiative represented at the workshop gets up to 5 minutes and up to 3 slides to introduce their awesome work.</p> <p>Yep, it's a tough gig but that's all we have time for! Be warned that the facilitator will have a bell</p> <p>If several people are attending from your initiative, please negotiate who will deliver the presentation</p> | A nominee from each reporting initiative represented at the workshop will be invited to present. You – or your colleague! |
| 10:30 | Morning Tea | | |
| | | <ul style="list-style-type: none"> • Fitzroy Partnership – Nathan Johnston • Darwin Harbour – Simon Townsend • SEQ Healthy Waterways – Paul Maxwell • Gladstone Healthy Harbours – Mark Schulz | |

| | | | |
|-------|--|--|-----------------------------|
| 11:00 | Speed reporting - continued | <ul style="list-style-type: none"> • WA Estuary Report Card - Catherine Thomson • Northern NSW - Sara Mika • Great Barrier Reef - Greg Greene • Lake Eyre Basin - Glen Scholz • Wet Tropics - Suzanne Jenkins • Mackay HRRP - Charlie Morgan • NSW Estuary Health Reporting - Peter Scanes • Victoria-Regan East & others • Wallis, Myall & Karuah Mid Coast NSW - Prue Tucker • Nigel Willoughby - SA NRM Report Cards • Murray Darling Basin - Justine Smith • SA surface water status reports - Dan Penny • SA Aquatic Ecosystem Condition Reports - Clive Jenkins • Others | |
| 13:00 | Lunch | | |
| 14:00 | Cultural reporting and engagement | <p>How does one go about measuring and reporting the #People#Waterways#Happiness Nexus?</p> <p>Two case studies (Lake Eyre Basin and Gladstone) will be presented to get you thinking about what might work in your neck of the woods.</p> | Glen Scholz & Uthpala Pinto |
| 15:00 | Steering the 'stewardship' - what is best practice in assessment and reporting on management effectiveness | <p>The recently prepared Network document that covers stewardship approaches will be used as a reference as we explore how each initiative tackles stewardship reporting and what is considered to be the elements of a best practice approach.</p> <p>We will also take a look at some international best practice approaches and applications outside the environmental reporting perspective</p> | Greg Greene |
| 16:00 | Afternoon Tea | | |
| 16:30 | Merry little stroll | We will to the bus terminal! | |
| 17:00 | RiverCrawl Local Report Card case study, tour, dinner. | <p>We will be learning about the health of Brisbane River and initiatives being delivered by Healthy Land and Water.</p> <p>Dinner at The Charming Squire Dinner proudly supplied by workshop sponsor Gladstone Healthy Harbour Partnership</p> | Paul Maxwell |
| 20:00 | Close | | |

Wednesday 22nd March 2017

| Time | Item | How it will work | Facilitator |
|-------|--|--|--|
| 6:00 | Riverside walk/run | Optional social event catering for all ability levels. Meet at designated hotel Lobby (Ibis Brisbane). | For those who were sensible at dinner the night before. Nathan Johnston |
| 8:00 | Welcome | Review and introduce day ahead | Lyndal Hansen |
| 8:30 | Report card onions Can we deliver tiered report cards without too many tears? | Case studies followed by facilitated discussion. Explore the potential for nesting report cards with emphasis on the mix of initiatives represented in the room as the case in point | Murray Darling Justine SmithGreat Barrier Reef Carl MitchellFacilitator: Kirstin Kenyon |
| 9:30 | Report card BMI Report card thresholds, weightings and normalisation criteria | A show and tell session. Break into small groups and discuss a.) Formulas & mathematics b.) Human process for selection (rationale) Report back to wider group, with a view to consolidating findings after the workshop and using this as the basis for development of a compendium of existing approaches | Introductory Presentation Nicole Flint Attendees will be encouraged to bring along threshold, weighting and normalisation criteria relevant to their initiative where this applies. Please start to think about your materials relevant to this session Facilitators: Nathan Johnston & Nicole Flint |
| 10:30 | Morning Tea | | |
| 11:00 | Report cards beyond the abacus | Exploring how technology can help improve quality and efficiency of report card development Break into small groups and discuss what might work in your particular situation. | Machine Learning, Artificial Intelligence, Big Data and what it might mean to the future of report carding Luke UkkolaAutomated waterway health assessment and reporting Nathan JohnstonSmall group session Attendees should start to think about their particular initiative and where technology may support efficiency of reporting or other activity Facilitator Luke Ukkola |
| 12:00 | Partnering and collaboration Why can't everyone just think like me? | Role play with 'thinking hats' and sector hats. Time for personal reflection and observation on what this might mean for your particular initiative and mix of investor, partner or sponsor arrangements | Facilitator: Tanya James, Collaboration for Impact Associate |
| 13:00 | Lunch | | |

| | | | |
|-------|--|---|---|
| 13:00 | Lunch | | |
| 14:00 | Get my message? | <p>A session to get you thinking about your report card from a marketing and promotion perspective.</p> <p>You will then use this as inspiration to have a crack at designing a revised or new product for your initiative</p> | <p>Interactive session and practical exercise exploring marketing, human behaviour and graphic design elements of report cards Including application of the learnings to a live item. Please start to think about the item you will work on for the session</p> <p>Facilitator: Lyndal Hansen</p> |
| 16:00 | Beyond the workshop and beyond report cards... | <p>Reflection of the workshop.</p> <p>Introduction for the major topic of discussion for the next Network teleconference. This topic is how report cards can be used for:</p> <ul style="list-style-type: none"> a) decision making and guiding on ground action b) community engagement outcomes | <p>Reflection & Beyond reporting discussion starter</p> <p>Prue Tucker</p> |
| 16:30 | Close | <p>People travel home. Informal dinner at Julius Pizzeria or similar arranged on the day for those overnighting in Brisbane</p> | |

Practitioner Workshop

20 – 22 March 2017
Brisbane, Queensland

The collage features several key elements:

- Map of Australia:** A central map of Australia with red location pins for Perth, Adelaide, Melbourne, Sydney, Brisbane, and other coastal cities. Labels include 'NORTHERN TERRITORY', 'WESTERN AUSTRALIA', 'SOUTH AUSTRALIA', 'NEW SOUTH WALES', 'VICTORIA', 'TASMANIA', and 'Great Australian Bight'.
- Water Quality Report (Top Left):** A report titled 'NEW STEPHEN MOUNT FOR THE DEERHORN' with a 'Scorecard' showing a 'D' grade. The scorecard legend includes: A Very good, B Good, C Moderate, D Poor, E Very poor, ND No data available.
- Water Quality Report (Middle Left):** A report titled 'HEALTHY RIVER REEF PART' with a 'Scorecard' showing a 'C' grade.
- Water Quality Report (Bottom Left):** A report titled 'WOLLONGONG' with a 'Scorecard' showing an 'A+' grade. It includes a table for 'WOLLONGONG' and 'CHAMBERS' with various sub-categories and their corresponding grades.
- Tropics Report Card 2015:** A report titled 'Tropics Report Card 2015' with a 'Scorecard' showing a 'B' grade.
- Water Quality Report (Right):** A report titled 'Water Quality card' with a 'Scorecard' showing an 'A' grade.

Practitioner Workshop

20 – 22 March 2017
Brisbane, Queensland

The collage features several key elements:

- Map of Australia:** A central map of Australia with red location pins for Perth, Adelaide, Melbourne, Sydney, Brisbane, and Newcastle. It is labeled with 'Australia', 'WESTERN AUSTRALIA', 'SOUTH AUSTRALIA', 'NEW SOUTH WALES', 'VICTORIA', 'TASMANIA', 'NORTHERN TERRITORY', 'QUEENSLAND', and 'Great Australian Bight'.
- Water Quality Report (Top Left):** A report titled 'NEW STEPHEN MOUNT FOR THE DISTRICT' with a 'Score' of 'D' (Poor) and a 'Grade' of 'D'. It includes a legend for 'Score' (A Very good, B Good, C Moderate, D Poor, E Very poor, ND No data available) and a map of the region.
- Water Quality Report (Middle Left):** A report titled 'HEALTHY RIVER REEF PART' with a 'Score' of 'C' (Moderate) and a 'Grade' of 'C'. It includes a legend for 'Reef Condition' (Good (≥ 65), Caution (35 - 64), Poor (≤ 35)).
- Water Quality Report (Bottom Left):** A report titled 'WOLLONGONG' with a 'Score' of 'A+' and a 'Grade' of 'A+'. It includes a legend for 'Reef Condition' and 'Overall Estuary Grade'.
- Water Quality Report (Middle Right):** A report titled 'Tropics' with a 'Score' of 'B' (Good) and a 'Grade' of 'B'. It includes a legend for 'Reef Condition' and 'Overall Estuary Grade'.
- Water Quality Report (Bottom Right):** A report titled 'HEALTHY RIVER REEF PART' with a 'Score' of 'C' (Moderate) and a 'Grade' of 'C'. It includes a legend for 'Reef Condition' and 'Overall Estuary Grade'.
- Infographic (Bottom Right):** An illustration of a yellow buoy with 'RESEAN KEEP CLEAN' written on it, surrounded by a fish, a turtle, and a bird in the water.

Report Cards

beyond the abacus

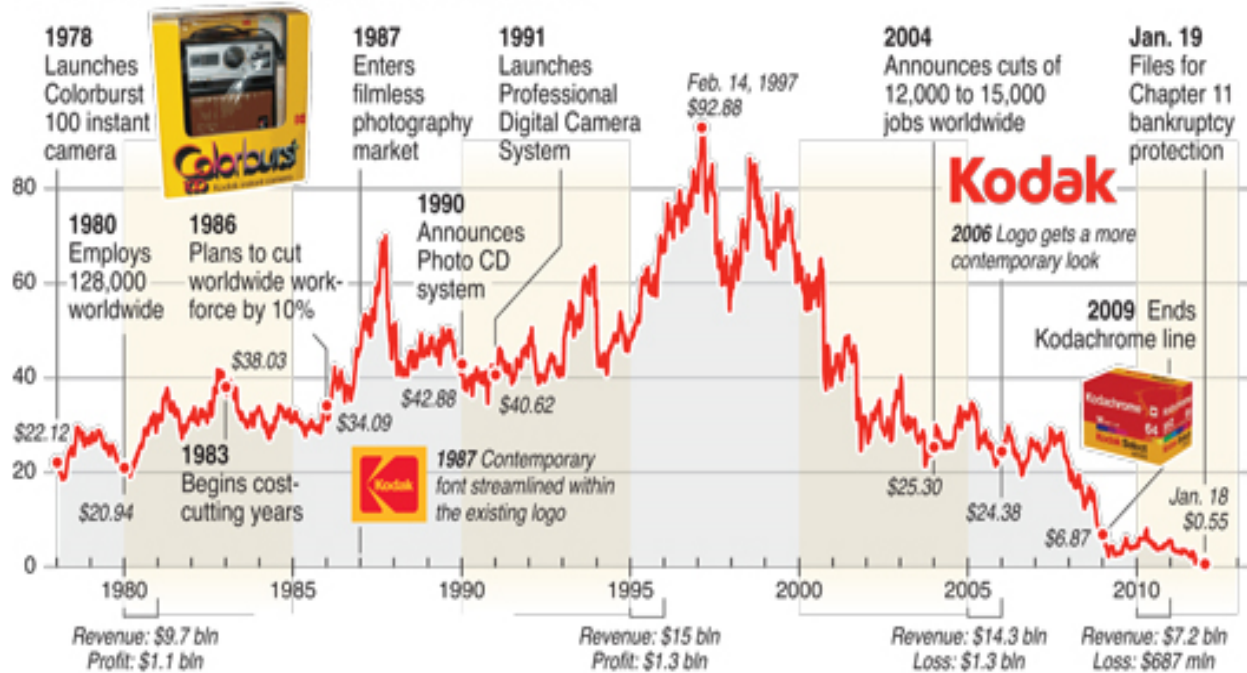

Kodak Example

KODAK FILES FOR BANKRUPTCY

Eastman Kodak Co, a 130-year-old photographic film pioneer, has filed for bankruptcy protection. It said it had also obtained a \$950 million, 18-month credit facility from Citigroup to keep it going

SHARE PRICE HISTORY — WEEKLY CLOSE IN US\$

Sources: Eastman Kodak Co., Thomson Reuters, news reports

- Ran a loss 7 of 8 years: 2004-12
- Did not move into digital world well or fast enough
- Were people who saw it coming
 - buried in the organization
 - did not act early enough
- New technology:
 - fierce competitors
 - low margins
 - Eats into margin of core business.
- Kodak did not take decisive action to combat the inevitable challenges.

Kodak Example

- After being innovation leaders, Kodak moved to one overflowing with complacency.
- In the late 1980s. Kodak was failing to keep up even before the digital revolution when Fuji started doing a better job with the old technology, the roll-film business.
- With complacency rock-solid and no one at the top devoting priorities toward turning the problem into a huge urgency with opportunity, they went nowhere.
- We now see this playing out again with camera companies and smartphones

So how is the relevant to us and what can we learn from Kodak's failure?

Why is this important to your report card initiative?

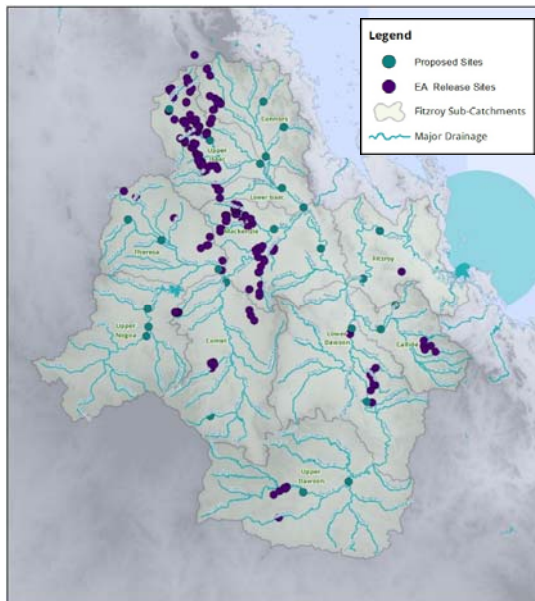

- Perhaps you have an established report card process that works with what seems to be a reliable revenue stream. Everything is going ok just how it is. But what if you loose a major funding provider or government priorities change? Can you weather the storm?
- Perhaps funding was good in the first few years, but interest and funding is waning
- Perhaps you have a growing list of priorities and additional information to report about but the bucket of funds isn't getting any bigger.
- Our failure puts more than profits at risk. It is the sustainable management and care of our waterways that is on the line - so we must thrive.

Leveraging from IT advancements is an item everyone must consider

Technology & Efficiency

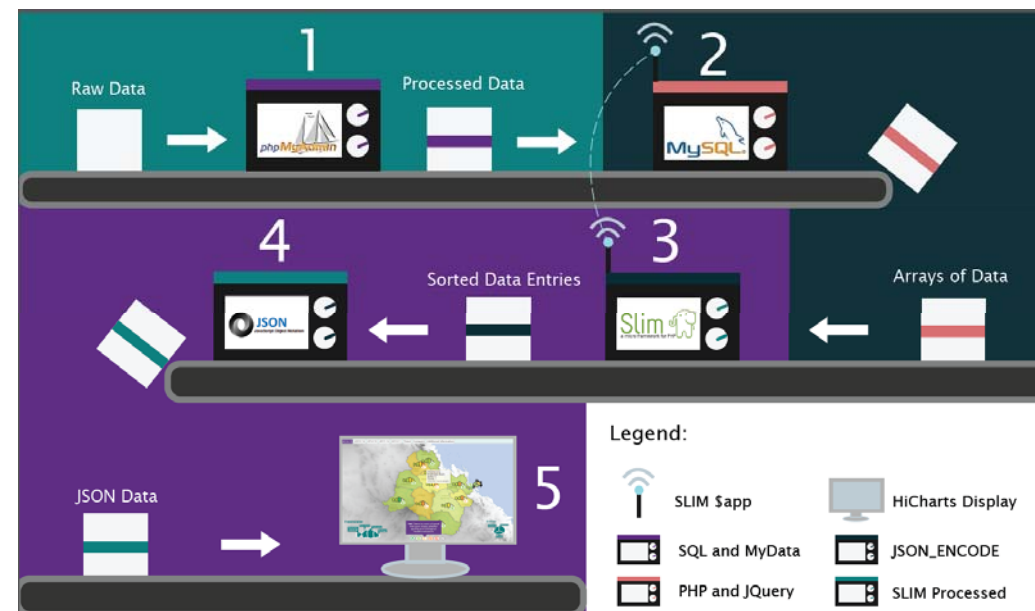

Report Card Production Process

Report Card Development Process

**Throughout the development process templates are used wherever possible to improve efficiency and encourage future-proof development strategies.*

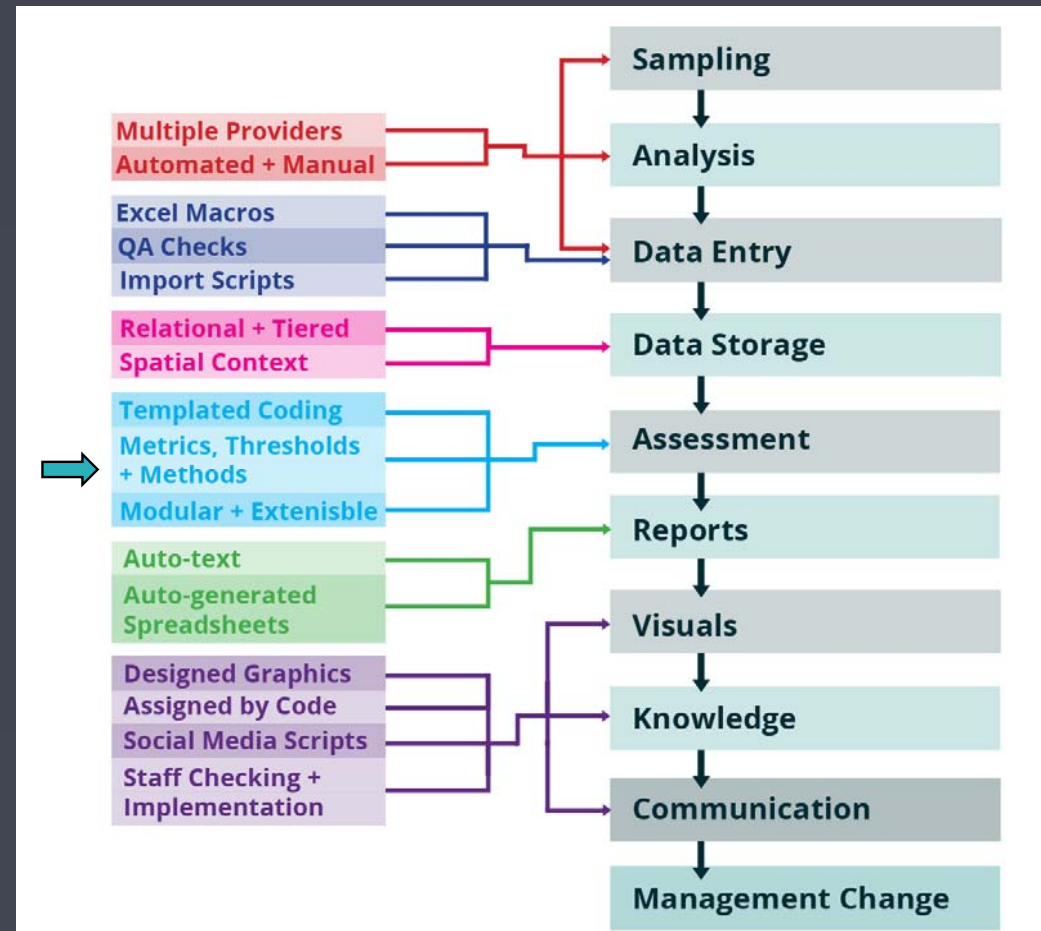

- 1. Raw data is received from various providers. Data is then sorted and uploaded using MyData (PHP driven) into SQL databases.*
- 2. PHP is used to run JQuery and access data from SQL databases. This data is then stored into arrays under relevant variables. Grading is calculated based on array values.*
- 3. Slim app is a toolkit used as a framework for MyData. It enables acquisition of specific datasets from SQL databases.*
- 4. Arrays of data are converted to JavaScript data entries using JSON_ENCODE. Data at this stage is ready to be displayed using HiCharts and can utilise GeoJSON.*
- 5. Requested datasets are displayed in various forms and compiled...*

```

```

What's Going on here?

- Setting up results so they are geospatially aware and tiered (in this case region, basin, catchment)
- Preparing the results (arrays) relevant to these special context
- Preparing results (arrays) relevant to the geometries (eg. Physical & Chemical) and Indicator (Conductivity)

```

public function arrayToFeatureCollection($results, $GeoColumn, $out = 'json')
{
    $possible_outputs = array('json', 'array');
    if (!in_array($out, $possible_outputs)) {
        throw new exception('Outkown output method: ' . $out);
    }

    //add all the results to a feature collection
    $feature_collection = array(
        "type" => "FeatureCollection",
        "features" => array(), // <=this is where our features will go.
    );

    foreach ($results as $result) {

        //For each catchment we want to define it as a "feature", an ele
        //A feature is an object with geometry and properties.
        //geometry comes straight from the database as GeoJSON
        //properties are any fields we want associated with the geometry

        //define a new "feature"
        $new_feature = array(
            //type is Feature
            'type' => 'Feature',
            //Geometry is our geoJSON data from the database
            //Im decoding the JSON here because it is being constructed
            //It will be converted jack to proper json in the object whe
            'geometry' => json_decode($result[$GeoColumn]),
            //a unique ID
            //'id' => $row['catchment ID'],
            //an array of properties from the database, Extra column info
            'properties' => array(
                ),
            ),
        );

        //push that to our set of features
    }
}

```

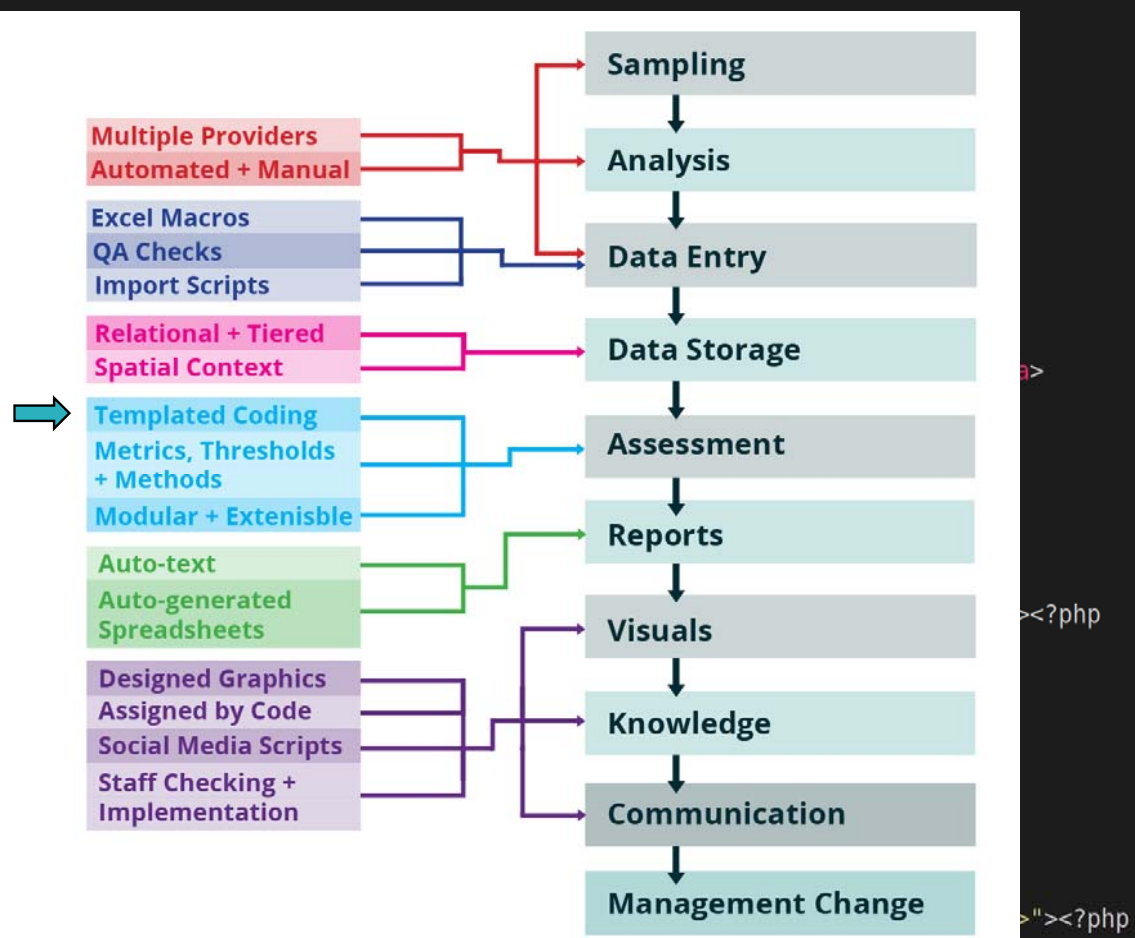

What's Going on here?

- Providing spatial context to the site/area about to be served up to the webpage so they line up correctly on a map
- Assigning the results to this spatial feature so it can be served up to highcharts as a pretty map

```

```

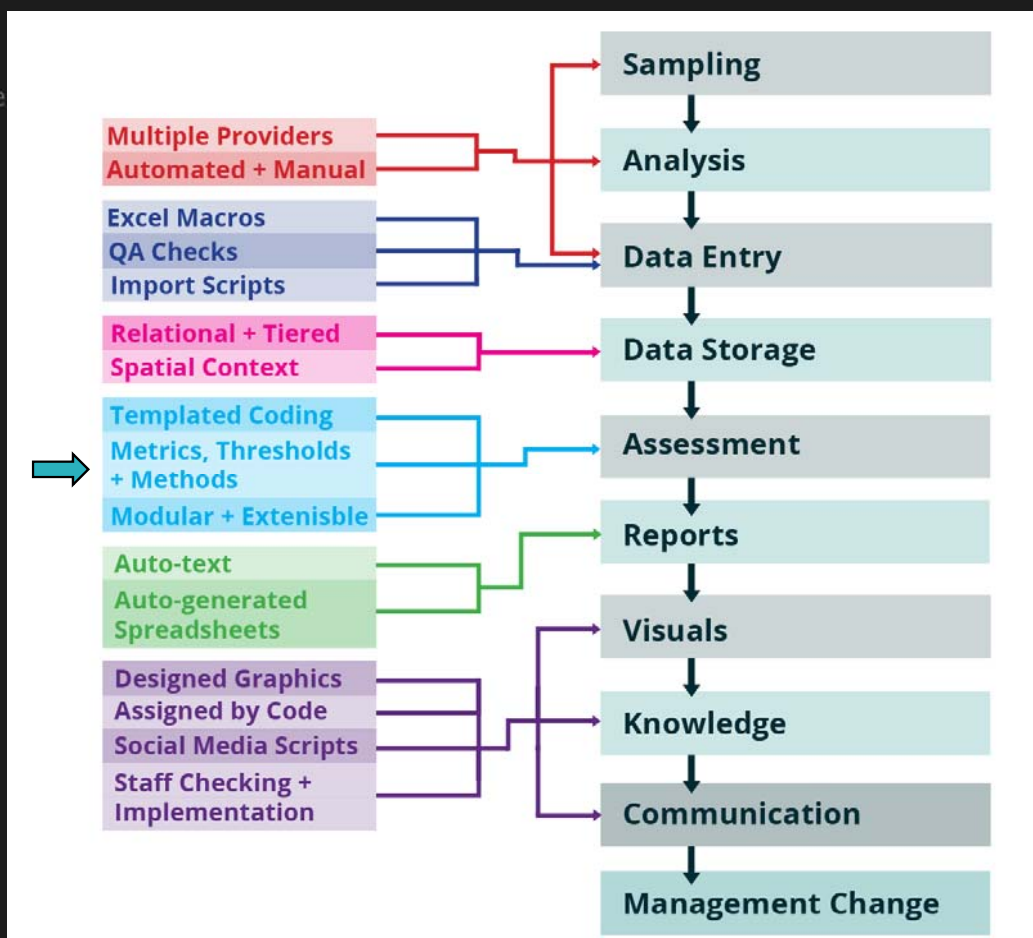

What's Going on here?

- Code is written so that it can be used across multiple web development applications.
- Templated coding is a core philosophy and is employed wherever possible to facilitate extensibility
- Templated coding allows the creation of new reporting products for Fitzroy and external clients cheaper

```

3 function EHMP_formula($value, $parameters)
4 {
5
6 // maths for assessment (EHMP Method). Assumes anything better than the
7 // worse than WCS scores zero, in between gets formulised in the else
8 $wqo = $parameters['wqo'];
9 $wcs = $parameters['wcs'];
10 if ($value <= $wqo) {
11     $score = 1;
12 } elseif ($value >= $wcs) {
13     $score = 0;

```

What's Going on here?

- This is what an image looks like in code

- Art in numbers!

IT improvements for FPRH

- Automated indicator and metrics dashboard
- Automate raw biota calculations (Macros and Fish)
- More detailed statistical analysis of results
- More additional information to support the main report card
- Automate content preparation and link to social media feed
- Work toward 'lite' version of EnviroScore Online product for small report card groups
- Incorporate more EV reports (primary + secondary recreation)
- Incorporate social, cultural and stewardship elements
- Visualising catchment modelling scenarios
- Plus more!

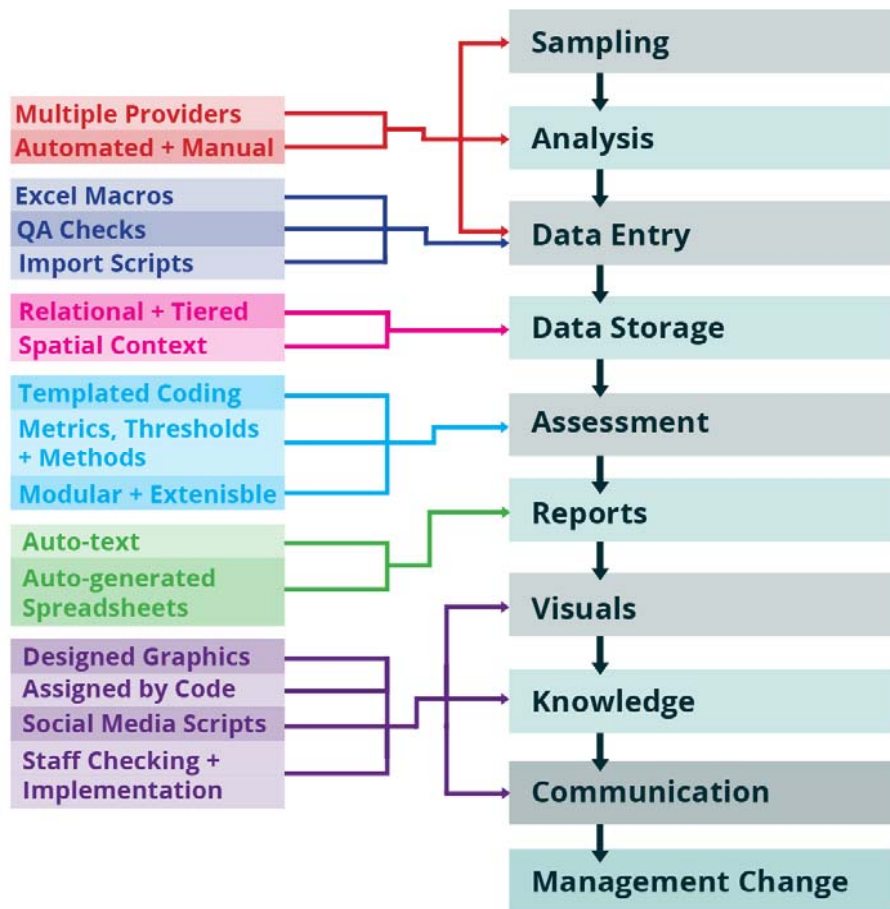

But this just made my job redundant!

We still need you!

- Graphic designer input (establishment, rebranding and larger product range)
- Continuous improvement to Science Knowledge, followed by updates
- Manual technical input – there will always be exceptions!
- Have more time to focus on human interaction and knowledge transfer
- Reach out beyond your report card – other areas other environmental assets
- Dedicate more time for in depth analysis
- Prepare one off bespoke communications products (children's books)
- Learn how to code and add web developer to your portfolio

Activity: Reflection

- What elements of your report card process require the most manual handling currently?
- How could you use technology to reduce this effort?
 - Web development dependant
 - Efficiency not requiring web development
 - Short term
 - Long term
- What elements are common? Collaborate to reduce up-front cost?

Over to Luke
