

FITZROY PARTNERSHIP FOR RIVER HEALTH

GREAT BARRIER REEF COLOURING SHEET

Help us colour and breathe life into one of Australia's wonderlands, the Great Barrier Reef...

Did you know the Fitzroy Basin in central Queensland is the largest basin in Australia flowing to the Great Barrier Reef lagoon, one of the most amazing habitats on earth?

Fitzroy Partnership for River Health has an important role to play in the future of the Great Barrier Reef. We partner with governments, agriculture, resources and community to create a better water future for the Fitzroy Basin and the reef.

We report on water quality of the catchments, rivers and creeks in the Basin, and we also assess the health of coral, sea grass and water quality for the inshore marine zone. This is because the water from our rivers and streams flows to the reef, so the health of the two is inter-connected.

Help us protect the Great Barrier Reef by doing your bit to care for your local waterways.
