

Strategic Plan 2021-2024

Fitzroy Partnership for River Health is a formal collaboration between government, industry, research and community organisations that have an interest in the health of waterways across the Fitzroy Basin.

Vision

Healthy waterways in the Fitzroy River Basin through trusted information

Mission

A collaborative partnership reporting on the condition, sustainable use and resilience of waterways to the Fitzroy Basin community.

Scope

All waterways in the Basin including estuaries, and activities to maintain and enhance the health and resilience of waterways.

Strategic Activities

1. Review the engagement and marketing strategies.
2. Support implementation of the most fit-for-purpose Basin monitoring program to enable best coverage and use of resources.
3. Develop new indicators and reporting areas to ensure relevance of the Partnership is maintained.
4. Undertake a 10-year data review of the Ecosystem Health Index.
5. Undertake a 10-year overall Program Design review.
6. Include recommendations from EHI Report Card results and trends in the Stewardship Reports.
7. Ensure Science Panel expertise covers all elements of Partnership reporting.
8. Undertake workforce planning to maintain employee engagement and ensure adequate resourcing into the future.
